

ZONING INTERPRETATION RECORD

Subject of Interpretation: Building - definition

Zoning Ordinance Section Number: 3.100

Title of Section: Definitions - general

Cause for Interpretation: Vacueness of the meaning of the word "shelter"

Interpretation: The word "shelter" as used to define buildings shall mean protection of ANY KIND from the weather. Therefore, a building with an open lattice roof shall be considered to provide "shelter" as it offers protection from the sun. Accordingly, these buildings, depending upon their placement, shall observe the setbacks required for main structures or accessory buildings as prescribed in Sec. 7.200 of the Zoning Ordinance.
